

ABOUT ME

I am a very analytical person who likes that tasks are performed in the most optimal way possible, I like to propose projects of value to companies with decisions based on data. I like to find patterns in data and take advantage of them to obtain valuable information. I value punctuality, I love to support my coworkers and listen to valuable lessons from them.

WORK

Customer Service Tier 1 Concentrix

I gave solutions to technical problems related to DNS for a registrar, thanks to my critical thinking I was able to find areas of improvement in customer service, which also helped me to improve my speed of service, I was employee of the month multiple times, this job helped me enormously with my soft skills that complements perfectly with my knowledge.
